OUR SELECTION

Tomatoes that refer to the traditional idea of sun-dried tomatoes, but which, thanks to the technique with which they are treated, retain all their colour and flavour. They represent a union between the genuineness of the raw material and the advanced processing technique

SUGGESTIONS

A perfect pairing for fresh cheeses, delicious with ricotta. It can be also used as an appetizing ingredient for sandwiches or bruschetta. Perfect to enrich a pasta seasoned with tuna. Ideal also for a pizza topping paired with Mortadella and pistachios: take care to add the tomatoes only after baking!
