OUR SELECTION	In the Cantabrian Sea, anchovies have the possibility to eat a lot in a water more oxygenated and colder than those of the Mediterranean; this leads them to develop a layer of fat such as to make the meat juicy and firm. The fat is one of the qualities of these anchovies, for this reason, the best catch is between April and June, in the months just after winter
CURIOSITY	Every single fillet is cleaned and packed by hand by a group of women, the fileteras', who traditionally dedicate themselves to this work with skill and meticulousness
